

## The cure to your problems

*Paul from Sales is using his laptop in a WiFi hotspot. He gets up to refill his latte and his laptop disappears. He has no back-up.*

*Helen from the Legal Department takes her laptop home to work on a case. Her nine-year-old uses the computer to surf the Net and accidentally downloads a worm that deletes the entire harddisk. She has no back-up.*

*Richard in HR is working late at the office when a power surge hits, wiping out his files. He has no back-up.*

80% of corporate data is in your desktops and laptops.

You need a back-up solution that's easy to use, simple to implement and affordable without any compromise in security and privacy.

REDiSAFE's back-up solution is simple, safe and smart.

### Simple

REDiSAFE is designed for real people; you don't need a computer science degree to use it. The intuitive user-friendly interface is so easy to navigate, you'll be up and running in minutes. An hour of training and your own department staff can handle the server administration and train other users without the IT department.

The REDiSAFE Guardian Servers install seamlessly into your office network in less than an hour to automatically back up individual desktops and laptops with complete privacy and total security.

REDiSAFE's web client application runs on Windows, Mac, Linux and Solaris platforms. Back-ups are scheduled to run automatically on a user-defined schedule in the background. Email notifications and reports keeps users and administrators up to date instantly. For users, this means no time wasted on tedious back-ups, and for the administrator, near-zero maintenance.

Simple doesn't mean slower. REDiSAFE offers a blazing 1GB of back-up in just 6min 30s on average from a typical office computer REDiSAFE Guardian W30 Testing Review. Individual files can be restored almost instantly.

### Safe

REDiSAFE was built for the toughest security. The industrial-grade security and privacy on robust Linux hardware uses emergency tokens for extra security on individual

On robust Linux hardware uses emergency tokens for extra security on individual password-protected vaults with strong privacy codes. During file transfers, the transport layer is secured with industry-proven protocols and algorithms. REDiSAFE's extreme security makes it the choice of ministries, government agencies and multi-nationals for highly-sensitive executive back-ups.

REDiSAFE is the proven solution for companies as diverse as PepsiCo Asia-Pacific, Singapore Power, Teleperformance, Keppel Corporation, LanTroVision and Travelex.

The Guardian Servers are available in 200GB, 600GB, 1.2TB and up to 2TB configurations, roomy enough for the biggest department. Thanks to REDiSAFE's storage scalability, you can cover anyone from branch offices to top executives to the entire company. Adding a mirror back-up is as simple as plugging in a second server.

### Smart

REDiSAFE delivers a business back-up solution so affordable, even your CEO will agree.

A typical REDiSAFE server returns 24/7/365 back-up with near-zero maintenance for as little as 22c a day - and no hidden costs.

Go even further and have REDiSAFE host your back-up boxes in our offices. Our comprehensive SLAs deliver the highest service and performance with no hassle to you
