

REDiSAFE Guardian Plus YOU!

REDiSAFE had its “Guardian Plus YOU!” event held at Vivocity Golden Village on the 11th October 2006. The movie event was held to show appreciation to our customers and also to launch the new REDiSAFE Guardian Plus. The event was a success with many guests turning up including people from the various industries and from the government sector.

During the pre-movie reception, REDiSAFE took the opportunity to share with their customers the new features of Guardian Plus, and how it can further benefit their business. Many of the customers were astonished by Guardian Plus with its new and improved features.

REDiSAFE Chief Operations Officer, Mr Chan Meng Piow gave a short opening speech before the start of the movie “World Trade Centre”, thanking all the guests for taking time off to grace the event and also for their continuous support in REDiSAFE.

The show “World Trade Centre” re-enacts the horrific event of 9/11 on the September 11th, 2001. The fateful event triggers the alarm bells in people that there are many things in life that are totally unpredictable. Uncertainties are everywhere. To be able to withstand

these uncertainties, mindsets must be tuned to being proactive in every aspect that is within our control. Ever since the 9/11 emphasis has been placed on disaster management.

Incidentally, the concept behind REDiSAFE’s data protection products was a result of the fateful event. REDiSAFE in the business of data disaster prevention hopes that their products can benefit many of their users Asia wide.

“Guardian Plus YOU!” gave our customers an opportunity to learn more about the next-generation system and talk about how it can help cases of such disaster. But most importantly, we would like to thank our customers for readily supporting REDiSAFE, putting their confidence in our product making it what it is today.
